

PAVING SOLUTIONS

YOU CAN
COUNT ON

EQUIPMENT • RENTAL • SUPPORT

CONSTRUCTION | ENVIRONMENTAL | PAVING

Since 2007, Hills has been a resource for more than just equipment. While we specialize in three unique equipment industries, our principles are about more. It's about providing reliable and credible support through the entire lifecycle of the work — from financial services and equipment training to 24/7 support, collaborative fleet management, parts, maintenance, service, repair, equipment and attachment rental and application-specific know-how.

Hills brings solutions to help you win more work, drive uptime, stay ahead of schedules and keep the total cost of ownership down.

PAVING

Partner with our longtime asphalt industry pros and our dedicated service team. We're ready with 24/7 service and responsiveness — because we know that the road waits for no one, and uptime is the key to your success.

*OEM availability varies by region. Consult your Hills Rep.

UPTIME OPERATIONS

Uptime is Standard at Hills

All new equipment from Hills Machinery receives one year of Uptime Service coverage* including real-time machine monitoring, preventive maintenance (parts and labor) and downtime prevention alerts.

*Uptime Service coverage varies for compact equipment and does not include preventative maintenance parts and labor.

Road Wideners

Brand	Model	Net hp	Hopper Capacity	Spread Width	Tons Per Hour
Midland	SPD-6	62	2.75 Cubic yds	6'	300
Midland	SPD-8	74	3 Cubic yds	8'	450

Cold Planers

Carlson	CP130	130	22,500 lbs	8' - 15'	17'

Asphalt Distributors

BLACK-TOPPER™ FEATURES

- Custom tank sizes, with capacity options between 1,000 and 4,500 gallons
- One person operation with controls from the truck cab or near the rear of the distributor
- Electronic asphalt pump speed controls for more precise control
- Full circulating 12-foot spray bar with folding wings electric-hydraulic shifting
- Balanced, dual feed asphalt flow for uniform application across the full bar
- Meets all federal regulations for hot products

Legacy ChipSpreaders

FEATURES

- Hydrostatic 4 wheel drive package
- Variable width front spreader hopper
- Computer maintains uniform aggregate application even during changes in road speed
- Stores five different application rates
- Powerful Cummins diesel engine standard
- Variable width hopper hydraulically extends and retracts while spreading to cover the entire road and shoulder in one pass
- Folding Bat Wing Rear receiving hopper provides increased aggregate capacity and easy clean out of hopper
- Two sizes: Standard and BIG

Blackhawk® Lowboy Trailers

PAVER SPECIAL FEATURES

- Air Suspension - +3" adjustable ride height
- Full Width rear deck covered with 1.5"
- High lift gooseneck has over 35" of vertical travel
- Simple one hand adjustment of deck height and/or fifth wheel setting. No doors, shims or spacers

LIVE BOTTOM TRAILER FALCON FEATURES

- 42" wide belt. No slats to break, bend or wear. Unloads in 1/2 revolution of belt
- Bolt in easy to adjust and replace flashing covers
- Lightest in the industry. Optional aluminum bogie gains even more weight reduction
- One trailer does it all - hot mix asphalt, sand, gravel, recycled material, low slump concrete, aggregates small and large, and more

Crack Sealers

ECS 250/400 FEATURES

- Requires no solvent flushing at end of shift; no need to carry solvent on the machine
- Equipped with both automatic and manual operating controls, allowing custom functionality
- Closed loop, flow controlled hot oil system, controlled by a high pressure diesel burner
- Standard hose boom & swivel, keeps hose off the ground and prevents operator fatigue, also protects heating elements from road surface friction wear

Sealcoating Equipment

PAVEMENTSAVER II FEATURES

- Spray bar starts at 8 ft and can extend to 12 ft
- Hydraulic drive system is an independent circuit. No crossover power loss
- Dual braking systems, hydrostatic operational brakes and enclosed two wheel wet disc brakes for emergencies and parking
- Joystick operator controls

PAVEMENTSAVER III FEATURES

- Variable speed direct drive hydraulic Agitated Mixer
- Spray bar starts at 8 ft and can extend to 12 ft
- ARC system uses pressure sensing technology, allowing for computer control of spray system application
- Hydrostatic braking through the full range of operation

BC502SC FEATURES

- All spread, circulate & load functions are selected from the cab or side control
- Heavy duty 4.75 cu. in (75 cc) Sauer-Danfoss hydrostatic piston pump
- Cab control of the GSY, spray-bar asphalt valves, diagnostics, spray-bar raise, lower, side shift and spray-bar flush
- Break away wings to prevent damage if an object is struck while spreading product, shear pin replaceable in less than one minute
- On-Board Diagnostics

ADDITIONAL EQUIPMENT

Hills Machinery is your full end-to-end equipment provider with Construction, Environmental / Recycling and Paving equipment divisions. New or used equipment sales, rental, service, parts, attachments, financing solutions, equipment training and collaborative fleet management — Hills Machinery has you covered. Let us know how we can help.

TRAINING

Hills Machinery provides customers with access to application-specific training for their operators, service technicians, and general paving professionals. Each course is taught by technicians with decades of field experience. Attendees will enhance their understanding of proper equipment operations and maintenance through both instructor-led discussions and extensive hands-on learning opportunities.

1

ROAD CONSTRUCTION TECHNICAL TRAINING PROGRAMS

- Focus on road construction
- Skills taught include diagnostics and repair of paving, milling, and material transfer vehicle operations

2

ASPHALT PAVER TECHNICAL SERVICE SCHOOL

- Focus on road-building paver equipment
- Skills taught include safe operation, maintenance and service, engine diagnostics, troubleshooting, electrical systems, and hydraulic systems, as well as grade control and screed adjustment

3

COLD PLANER TECHNICAL SERVICE SCHOOL

- Focus on cold planer (milling) equipment
- Skills taught include safe operation, maintenance and service, engine diagnostics, troubleshooting, electrical systems, hydraulic systems, cutting drum and tooling systems, conveyor systems, water and dust suppression systems, and grade and slope control operation

4

MATERIAL TRANSFER VEHICLE TECHNICAL SERVICE SCHOOL

- Focus on Shuttle Buggy™ MTV
- Skills taught include proper maintenance, engine diagnostics, troubleshooting, electrical systems, and hydraulic systems, as well as best practices and wear component recognition
